

PERTH OPTUS STADIUM

Visually dynamic, decorative bonded aggregate surfacing

High aesthetics and wear component

Requirements:

The world-class multi-purpose 60,000 seat Optus Stadium and Stadium Park was nearing completion, and one of the final pieces of this huge design project was for the concourses leading to each of the stadium entrances. Architects, Hassell, proposed a distinctive and colourful design inspired by the six seasons of the local indigenous people and which reflected Western Australia's unique geology. The design encompassed over 24,000 sq metres and was applied at every entry area and throughout the entire external concourse.

Solution:

Antiskid recommended Omnigrip Deco Asphalt pavement surfacing with high aesthetic and wear characteristics and the many colours to choose from, Omniconcrete Deco paving system was perfect fit for the

Architects welcoming design specifications. Natural stone colours such as Pearl Marble, Gold Marble, Black Pepper, Olive Green, Cotta Granite and Red Granite truly reflected the Architects vision.

Product used:

Omniconcrete Omnigrip Deco Pavement system

Project details:

- **Date:** September – December 2017
- **Location:** Optus Stadium, Burswood, Perth, Western Australia
- **Construction:** Multiplex
- **Designed:** Antiskid Industries/Hassell
