

Causeway Underpass

Safe and Vivid Coloured Shared Pathway for Bicycle and Pedestrian Traffic
Slip Resistant Surfacing System. Low Maintenance.

Project Brief:

The Town of Victoria Park was undertaking a major refresh of a shared footpath approaching and under the Causeway Bridge. The area is located in front of the Burswood Casino & Hotel and is an essential path for pedestrians and bike riders. The path needed to be aesthetically attractive but also provide good slip resistance.

Antiskid's expert staff liaised closely with the staff at the Contractor including Engineering and Design to provide a solution.

Solution:

Antiskid Industries recommended installing the OMNIGRIP CST Surfacing System to the existing shared pathway. CST is not only economical and ensures optimum safety for users but is also aesthetically pleasing, and in harmony with the surrounding environment.

The team at Antiskid worked with the head contractors during all works to ensure that disruption for users was kept to a minimum. Then

the coloured areas were marked out and colours applied followed by the UV Sealer to promote long design life and assist in maintaining the cleanliness of the installation. This solution is low maintenance and will continue to be a dynamic feature for many years to come with minimal maintenance requirements for the Town of Victoria Park. All told, an outstanding solution.

Project Details

Date: May, 2017

Location: Causeway, Perth

Builder: MMM Civil

Client: Town of Victoria Park

Product Supplier: Omnigrip Australia

Contractor: Antiskid Industries
